

Install HP LaserJet Driver on Windows 11

Steps to download and install the HP LaserJet driver on Windows 11, including a User Account Control (UAC) warning.

Ensure you have administrative privileges on the Windows 11 machine.

1. Download the latest HP LaserJet driver from the HP support website.
2. Double-click the downloaded driver file to begin the installation.

The User Account Control (UAC) prompt appears.

3. Click **Yes** to allow the installation to proceed.
4. Follow the on-screen instructions to complete the installation.
